

## Andie Coulson Graduate Heritage Consultant

Andie Coulson is a heritage consultant and archaeologist. She holds a Bachelor of Science and Bachelor of Arts, majoring in archaeology, ancient history and geography, from the University of Sydney.

Andie has skills in archaeological fieldwork, digitisation, and post-excavation data organisation, storage and retrieval. She has experience in the excavation and survey of historical archaeological sites in Sydney, including ground-penetrating radar, data recording, and site mapping and photography.

Prior to joining GML, Andie worked as a subcontractor archaeologist on excavations of early colonial sites. This helped her gain experience in excavation, wet sieving, and artefact washing and sorting. She also volunteered as a team leader for the Australian Archaeological Institute in Athens' Zagora Project, where she trained and led a group of student volunteers in digitising, compiling and synthesising archival data. She was also responsible for creating physical and digital excavation records.

Andie has also completed a photogrammetry course at the University of Sydney. This has helped her build skills in photographing objects and sites, as well as developing models using the Agisoft Metashape program.

### Qualifications

Bachelor of Science and Bachelor of Arts, University of Sydney

### Professional Development

Photogrammetry course at the University of Sydney

Construction Industry White Card NSW

### Key Experience

#### Historical Archaeological Excavations

- Parramatta Light Rail, Robin Thomas Reserve, Historical Archaeology—Client: CPB Contractors.
